COMPANY PROFILE

Vestel City, which comprises nine plants located in Manisa, is amongst the biggest industrial complexes of the world.

Vestel City, which comprises nine plants located in Manisa, is amongst the biggest industrial complexes of the world.

As one of the leading enterprises in Turkey, Vestel is a major player in consumer electronics, mobile technologies, household appliances, professional displays and LED lighting with renowned products, including refrigerators, washing machines, tumble dryers, cooking appliances, dishwashers, air conditioners, water heaters, television sets, educational, hospitality

and digital signage solutions, digital set-top boxes, tablet PCs, and smart phones.

The company is recognised for its cutting-edge designs, high product quality, large production capacity, and superior market share growth.

Vestel is one of the ten biggest household appliance manufacturers in Europe, with its new product development ability, flexibility in production, and fast response to clients' demands.

Operating with an annual capacity of 3.2 million units,

the company's two refrigerator plants produce a variety of models ranging from french door, no-frost, combi, double door, single door, to table top fridges and freezers, as well as built-in models.

Achieving similar success with washing machines, Vestel is able to produce 2,6 million units a year, with models ranging from 4 kg to 9 kg drum capacities. The group added washer dryers to the product range in 2012. The new plant, consists of washer and dryer production lines, has started manufacturing in

Production Capacity

Export Leader of Turkey with
\$ 2,5 Billion

2018 with a 750K capacity for dryers and 750K additional capacity for washers. The plant for cooking appliances operates with an annual capacity of 2.2 million units, producing free-standing cookers, built-in hobs and ovens.

The household appliances product range includes free standing, semi and fully integrated dishwashers. The plant has the capacity to produce 2,5 million units a year.

In addition, the air conditioner factory is capable of

producing 750,000 units of split-type models.

Vestel is the first company in Turkey operating two manufacturing plants in Russia for the production refrigerators, washing machines, and televisions with the aim of becoming a leader in CIS countries.

Vestel Trade, the company responsible for the marketing and sales of Vestel products overseas, exports 73% percent of its production under leading Japanese and European brands to 155 countries.

Vestel Trade has achieved export sales of 8.3 million units of electronics and 4.8 million units of household appliances.

Distributing its products to seven continents, Vestel takes its place as a world-class company.

NoFrost MultiCooling

On the contrary with conventional technology, NoFrost MultiCooling technology includes two independent air circulation with two separate fans and evaporators. Since there is no transfer of cold air between fridge and freezer cabinets, NoFrost MultiCooling provides extra freshness with optimum humidity levels in each compartment, prevents odor mixing, and keeps flavor of foods.

Freezer Shield

Conventional refrigerator appliances are able to work at a minimum ambient temperature of **10°C**. However, with the new Freezer Shield Tech, Vestel appliances can work even if the ambient temperature is as low as **-15°C**, which makes it possible to place the appliances in the garage or in the balcony.

Less Frost

Thanks to the wrap around evaporator, LessFrost technology offers more efficient cooling, less manual defrost requirement, and more flexible storage room.

UltraPure Tech

This technology effectively removes odours from inside of the refrigerator. Thanks to the module located in the top of the cooling compartment, any molecules containing malodour directed to the filter, are broken down by special LEDs with the cleaned air directed to the fresh food. The quality of the air in the refrigerator improves and is always kept clean.

FRESHNESS TECHNOLOGIES

Vacuum Bag

Prolongs the shelf life of foods and keeps dairy products fresh up to **8** times longer.*

Increases life of food by removing oxygen.

Reduces growth of spoilage organisms and bacteria.

Prevents the occurrence of unpleasant odours.

Vacuumed food can be cooked with sous vide technique.

*Tested and certified by Third Party Laboratory.

Ferment store

FermentStore helps customers take homemade food to a new level; allowing them to join the growing trend towards fermented foodstuffs and helping them enjoy the known health benefits. As well as being tasty and appealing, fermented foods are known to be rich in probiotics which help restore balance in the stomach. In turn this aids digestion and boosts the immune system. The FermentStore feature allows users to create and store seven different types of food and beverage: yoghurt, kefir, bread dough, wine, beer, vinegar and pickles, which all can be fermented and kept with ease. After the fermentation process, the results can be chilled and stored in the optimum conditions.

Natural Ion Tech

Natural Ion Tech spreads negative ions which neutralize particles of unpleasant smell and dust in the air. By removing these particles, Natural Ion Tech improves air quality and removes airborne bacteria up to %99.99999.*

** Tested and certified by Third Party Laboratory.*

VitaStore

VitaStore Technology maintains fruits and vegetables fresh up to 30 days* and keeps aroma and nutrients together.

Humidity Controlled Crisper

Thanks to air channels and special filter, humidity level can be adjusted precisely to keep your fruits and vegetables fresh and crisp.

**Tested and certified by Third Party Laboratory.*

Chiller Zone

Ensures that the food inside is preserved at ideal temperature of around 0 °C. The frozen meat or fish can also be kept in this compartment for proper thawing before consuming. Chiller Zone also ensures that your meat & fish stays fresh for longer while keeping out unwanted odour.

Maxi-fresh Preserver

Maxi Fresh Preserver technology helps keeping food fresh longer time by absorbing ethylene gas (a bioproduct released naturally from fresh foods) and unpleasant odors from the crisper.

V-Lift

With the adjustable height mechanism, height of bottle shelf can be maximized for higher bottles or can be reduced to save space for the dairy shelf. Position of rack can be set to **6** different height.

V-Shelf

Provides more flexible storage room and higher shelf space thanks to the two-part shelf mechanism sliding on each other.

Door Reversible

Depending on the location of your refrigerator, you can adjust door opening direction thanks to the reversible door feature.

Zero Clearance

You can place your refrigerator next to the wall or cabinets and the door can be opened easily without need of any additional space at **90°**.

Water Dispenser

Offers quick and practical cold water access, and ergonomic use with **2** liter reservoir. Easy to replenish water

Ice Slide

Provides convenient storage spaces with a simple movement. The slide icematic ensures flexible storage and max capacity anytime you need.
